

Radiation Safety Program Refresher Training - 2005

All workers currently listed on your permit as approved radiation workers who were trained in 2003 are required to review the Radiation Safety Refresher training "Power Point" module and complete the following short quiz. The completed quiz must be returned to the Radiation Safety Office no later than June 30, 2005. Failure to respond by this date or achieve a grade of 70% will result in the workers name being removed from the approved worker list. All workers must have documented training in 2004 or later after June 30, 2005.

Name: (*print*) _____ Supervisor: _____

Department: _____ Phone: _____

E-Mail: _____

I acknowledge that I have reviewed the Radiation Safety re-training module for 2005.

Worker Signature: _____ Supervisor Signature: _____

1. The federal agency that oversees the safe use of nuclear energy and materials in Canada is the _____.

2. What are the three routes of potential disposal of radioactive waste as defined in our licence conditions ?
 - a) _____
 - b) _____
 - c) _____

3. Name the four categories of radioactive waste.
 - a) _____
 - b) _____
 - c) _____
 - d) _____

4. Name the two categories of low level liquid waste and the proper disposal method for each:

Category	Disposal Method
1.	
2.	

5. List five items that would be classified as biological radioactive waste:

1. _____
2. _____
3. _____
4. _____
5. _____

6. Solid waste stored in the lab prior to transfer to the storage area must be shielded to ensure radiation levels are below _____.

7. Complete the following table (applicable for dry solid waste)

Nuclear Substance	Storage Time
P-32	
P-33	
S-35	
I-125	
Cr-51	

8. _____ must be defaced or removed prior to disposal.

9. Who is responsible for ensuring that radioactive waste is packaged properly ?

10. The _____ is responsible for developing policies and procedures for the safe storage, collection and processing of radioactive waste.
